

BigMachines Administrator Training and Certification

Learn it, try it, do it! BigMachines Administrator Training classes are highly interactive courses designed to teach you everything you need to know to quickly and successfully implement and maintain your BigMachines Selling Platform.

Administrator Training teaches participants the fundamental concepts of setting up, customizing, and maintaining BigMachines. Students become familiar with the standard business processes enabled in BigMachines and how they can be used for best business results. The application architecture and prebuilt capabilities of BigMachines are taught in the context of a proven implementation strategy by certified BigMachines instructors. Through a series of hands-on labs and exercises, participants practice key tasks associated with setting up and maintaining BigMachines applications, putting their knowledge to work in an interactive session.

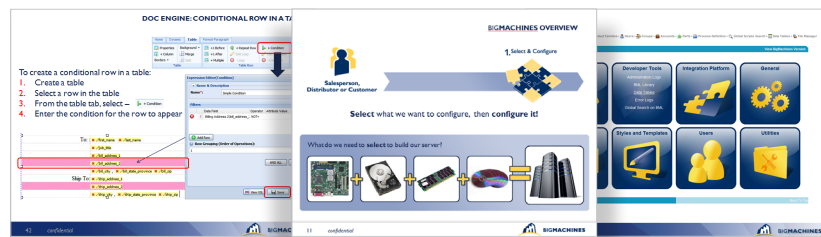

Classes and Certifications are available at two levels:

Yellow Belt Certification consists of the Admin Essentials Training Class and the Yellow Belt Certification Exam. Once students obtain Yellow Belt Certification, they can move on to earn their Blue Belt.

Blue Belt Certification classes offer advanced content in focused areas of the BigMachines platform. Students who successfully complete all four Blue Belt classes, and pass the Certification Exams at the end of each of those classes, will obtain the Blue Belt Advanced Administrator Certification.

Class attendees receive detailed training materials, which they can use for future reference as they administer their BigMachines platform

Yellow Belt Certification

Day 1 - Administration Overview	Day 2 - Configuration	Day 3 - Commerce	Day 4 - Document Engine
<ul style="list-style-type: none"> • Administrator terminology • Intro to configuration design • Customizing branding and site options • Importing and exporting parts and other data 	<ul style="list-style-type: none"> • Building and Maintaining Product Families • Setting up and Building your Configuration Model • Data Tables • Advanced function scripts 	<ul style="list-style-type: none"> • Understanding Business Processes in BigMachines • Customizing Commerce Process Fields and Layouts • Managing Users and Roles • Customizing Workflow Steps 	<ul style="list-style-type: none"> • Overview on Using the BigMachines Document Engine • Practice Setting up Sample Documents

Course Audience

This course is appropriate for application administrators, implementation team members, business analysts, consultants, and other individuals responsible for successfully implementing and administering BigMachines solutions.

Cost and Schedule

Pricing for the instructor led Yellow Belt Certification Class is \$2,195 per person, which includes the Yellow Belt Certification Exam to be taken on the last day of class. Class attendees receive detailed training materials including the BigMachines Cookbook, which they can keep for future reference as they administer their BigMachines solution. Students also receive access to online self-paced training materials for a limited time basis.

Also available is an online self-paced Yellow Belt Certification Class for \$1,995 per person, which includes the Yellow Belt Certification Exam to be taken when the online curriculum has been completed.

Classes begin on Monday and continue through Thursday. Monday classes start at 1:00 PM and end at 5:00 PM. Tuesday through Thursday, classes start at 9:00 AM and end at 5:00 PM each day. Please visit www.bigmachines.com/training1.php for the latest scheduled classes.

Training Location

This course is offered at BigMachines learning center in Deerfield, IL (near Chicago, IL, 20 minutes north of O'Hare airport) or at BigMachines offices in San Mateo, CA; Frankfurt, Germany; and London, UK. The course can optionally be delivered on-site for customers or partners for an additional charge.

All international classes are conducted in English, and the provided training materials are in English.

Registration

Current customers and consulting partners can register online for a BigMachines Training class by visiting www.bigmachines.com/training1.php.

Course Audience

These courses are appropriate for application administrators that require in-depth training on the most common uses cases in focused areas of the BigMachines application. These courses are designed for a technical audience.

Pre-Requisites

Yellow Belt Certification a prerequisite for taking any of the Blue Belt classes. In addition, it is highly recommended that students take the Advanced BML class and pass the final exam prior to taking the Advanced Configuration or Advanced Commerce classes.

Cost and Schedule

Students can take Blue Belt classes one at a time via web-based instructor led classes, or all four classes can be taken at BigMachines offices during a four day offering.

Pricing for the web-based instructor led Blue Belt Certification Classes is \$595 per class, per person, which includes the certification exam specific to that topic at the end of each day of class. Each student receives Blue Belt Certification upon passing all four certification exams.

Pricing for the four day Blue Belt Certification Class at BigMachines offices is \$2,195 per person, which includes the certification exams after each day of class. Each student receives Blue Belt Certification upon passing all four certification exams.

Instructor led web-based classes run from 9:00 AM to 5:00 PM when scheduled. Four day classes at BigMachines locations begin on Monday and continue through Thursday, 9:00 AM to 5:00 PM each day. Please visit www.bigmachines.com/trainingI.php for the latest scheduled classes.

Registration

Current customers and consulting partners can register online for a BigMachines Training class by visiting www.bigmachines.com/trainingI.php.

Due to the advanced content of the Blue Belt classes, seats are limited in both instructor led web-based classes and classes delivered at BigMachines locations.

BigIdeas Training Opportunities
